

Larry (Ran) Hui

Data Architect and Enterprise DE Professional (MBA)

Danville, CA 94526 | 925-201-9016 | larry311012@gmail.com | www.linkedin.com/in/larry-hui-6811a062

- MBA & Law degree evolved to AI/ML/Data Goro, seeking Individual Contributor or Team Lead role to help make quality Data Changes for progressive organization.
- Hands-on experience in the complete data platform lifecycle, encompassing expertise in Data Governance, ETL, Warehousing, Analysis, and Quality Assurance.
- Demonstrating exceptional collaboration with diverse teams to solve complex Enterprise problems with Data Products, accelerating business and growth.
- Architect Data Integration crossing platforms and providing Single-Source-of-Truth data repository connecting different Data Tools and Machine Learning Modules.
- Strategically conceptualized and executed Data Roadmap and Vendor Selection, designed solid data foundation for Fintech and Public Sector.
- Proficiently assume the mantle of leadership, providing mentorship to a dynamic team, driving team's continuous advancement with Agile Software Development Life Cycle.

EXPERIENCE

Sr. Data Engineer at Message Platform (Meta - Contractor)

12/2024 - Present

- o Enhanced platform reliability by developing and integrating advanced monitoring systems, leveraging and building AI-powered analytics tools to proactively detect and address user-impacting issues.
- o Led large-scale distributed infrastructure optimization initiatives, implementing data management strategies that significantly reduced storage usage and operational costs.
- o Engineered and deployed comprehensive pipelines, metrics, and data tables for encrypted message logging, enabling robust A/B testing. Collaborated with the Data Science team to enhance user engagement analytics, resulting in a 25% improvement in data-driven decision-making.

Sr. Data Engineer at Battery Analytics & Machine Learning (Apple - Contractor)

03/2024 – 12/2024

- o Initiated and executed data infrastructure migration to Airflow, Kubernetes, and Docker, handling both periodically incremental changes from Spark and real-time data ingestion for monitoring hardware testing with multiple DAGs. Also, architected a CI/CD pipeline to automate build.
- o Designed and delivered multi-layer data models using SQL and Python on DBT, reducing data loading time from minutes to 5-10 seconds. This optimization enhanced organization-wide analytics capabilities with Snowflake UDF, providing faster and reliable insights with Role-Based Access Control.
- o Partner closely with Data Scientist to re-shape and enhance data visualizations using Tableau. Integrated metadata into visualizations with more dynamic and context-driven insights, leading to more effective decision-making and improved data interpretation.
- o Performance comprehensive analysis of user and simulation encoding data, leveraging statistical modeling to identify trends and problems. Automating Quality Testing to enhance accuracy.
- o Created comprehensive data documentation on Confluence, summarized data operation and transformation, helping users track data lineage and scale data for ML application.

Lead Data Engineer (Revance – Public biotechnology company w/ PayFac)**03/2020 – 09/2023**

- o Designed and maintained ETL/ELT pipelines for integrating 20+ data sources on AWS, achieving end-to-end PayFac analytics solutions delivering to customers in a minute.
- o Lead the development of a reliable Cloud data warehouse architecture and customized BI solutions with APIs, which enhanced data reliability, enabled real-time reporting, and cost reduction.
- o Managed data integration project and transformed to aggregation data layer with DBT. This initiative saved over 200 developer hours monthly with self-service analytics.
- o Advanced data cataloging and privacy internally, ensuring organized and secure data access. Collaborated with cross-functional teams to optimize data governance.

Manager, Data Analytics/Engineer (HintMD – 1st Payment Platform in Aesthetic)**01/2018 – 02/2020**

- o Demonstrated exceptional agility by designing and implementing a robust reporting system for the entire organization within 3 months. Created a scalable data infrastructure and implemented a KPI reporting process, powered a 20x increase in customer base, and directly benefited the marketing and sales team.
- o Identified gaps and challenges from a variety of internal stakeholders, subsequently defining Data Governance and Strategy frameworks, handling PCI/HIPPA compliance and legal review.
- o Build and mentor of 3-member data engineer team, upgraded ETL with customized python solution to build OLAP for payment platform. Setup SLAs standard and data quality assessment with alerts.

Senior Data Analytics – Accela (Could Government Solution)**09/2015 – 12/2017**

- o Lead Data Product designing and implementation into Azure Platform less than 10 months, empowered citizen tracks key metrics and gain actionable insights for government transparency.
- o Engaged with the Market and Sales team to validate pain points with ad-hoc analytics solutions.

Operations Management Analyst – Accela**09/2011 – 08/2015**

- o Reporting to COO, leveraged statistical modeling and data analysis to address business challenges, focusing on initiatives like Customer Segmentation, Cloud Migration, SaaS Pricing.
- o Established a performance measurement system for department performance measuring, adeptly quantifying ongoing project utilization and cost saving.

EDUCATION / CERTIFICATION / RECONGNITION

♦ **MBA** - Butler University **Master of Law** - Indiana University **BBA** -Anhui University of Economics and Finance

♦ **Certificate Looker Advanced Developer** **Machine Learning Specialization (Cousera)**

♦ **Matillion Emerald Award (2022)** **Top Achiever – Accela (2017)** **Revance Recognition (2021)**

Language	English, Mandarin
Scripting Language	Python, SQL, HTML, CSS, JavaScript, R
Database	Postgres, Redshift, Big Query, Snowflake, DynamoDB, Neo4j, Oracle, ClickHouse
BI Tools	Looker, PowerBI, Tableau, AWS QuickSight, Apache Superset, Domo, iData, M360
Tools/Framework	AWS, GCP, Azure, Matillion, Apache Airflow, DBT, Fivetran, Apache Spark, Docker, Jira, Bitbucket, Jekins, Salesforce, Zendesk, Confluence, DataDog, Office, Databrick, Databricks, Segment, Apache Atlas, Stitch Data, Pandas, NumPy, Sklearn, NumPy, Pandas, Matplotlib, SciPy, NLTK, Docker, Kubernetes, Daiquery, Deltoid, Scruba
